

Residential New Construction Industry Support

Missing Middle Housing

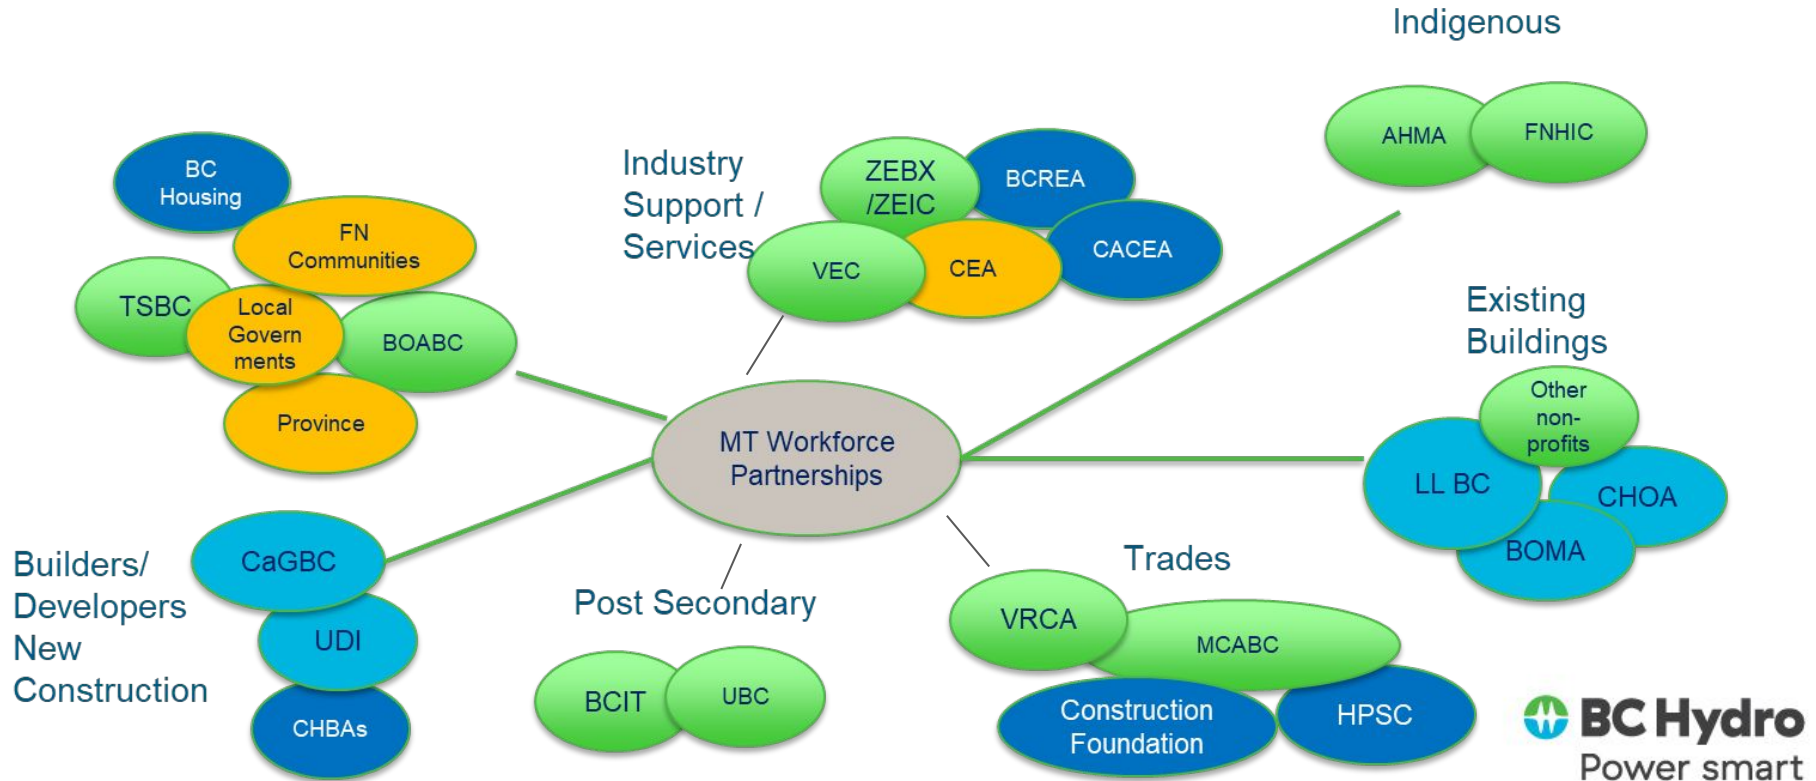

Mission: Enabling Market Transformation Towards Energy Efficient And Zero Carbon Housing

Building Industry will implement code if they are

- **Aware of its existence**
- **Understand its benefits, and**
- **Enabled to overcoming adoption barriers**

Approach: Industry Partnerships & Workforce Development

Supporting Missing Middle Housing

- Education and Training, Certification and Accreditation
- Research / Program Pilots
- Position Funding
- Best Practice Guides
- Event Support
- Networks and Committees

Builders/
Developers
8,000+

Building
Officials
~1,000

Licensees
and
Associates
~150,000...

What's next?

- **Training for Builders and Developers on 2-6 plex building archetypes - CHBA**
 - Zero Carbon Step Code and electrification in cold climates
 - Decoding the Code - Modelling and best practices
 - Power management best practices
 - LEEP: Integrated Design Process
 - Other...
- **Training for Building Officials on Code Compliance - BOABC**
 - Mechanical system best practices
 - Code Compliance Forms
 - Energy and Emissions continued education
- **Training for Energy Advisors - CACEA**
 - Step Code and Zero Carbon Step Code application
 - Integrated Design facilitation
 - F280 training
- **Training for Contractors - TSBC / MCABC / HPSC**
 - Mechanical systems best practices
 - Power management and electrical code applications
 - Workforce development - HVAC Roadmap
